/note="Vector: Lambda gill Sfi-Not; Site_1: EcoRI; Site_2: NotI: Several hundred adult Schistosoma japonicum(Jiangxi, P.R.China, Strain), of mixed sex, were perfused from the mesenteries of experimentally infected rabbits.

Double-strain cDNA synthesized with the mRNA isolated from adult worm, was inserted into the bacteriophage lambda gill Sfi-Not arms between EcoRI and NotI site of the LacZ gene. The CDNA library was contructed by Chen S.z. at Nanjing Medical University, Nanjing, Jiangsu, P.R. China. (see: Chen Shuzhen, et al. Chinese Journal of zoonoses 1997, 13 (6): 23-25;

Onote-"Organ: Kidney/Brain; Vector: pBACe3.6; Site_1:
Cool: Site_2: EcoR: Female C57BL65 mouses kidney and/or
brain genomic DNA was isolated and partially digested
with a combination of EcoRI and EcoRI Methylase. Size
selected DNA was cloned into the pBACe3.6 vector at the
ECORI sites. The ligation products were transformed into
DHIOB electrocompetent cells (BRL Life Technologies).

Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

bp mRNA linear EST 16-OCT-2001 sapiens cDNA clone IMAGE:5216512 5',
male lung, age 27; and 1 male testis, age 69. Library is oligo-dT primed and directionally cloned (EcoRV site is destroyed upon cloning). Average insert size 1.8 kb, insert size range 1-3 kb. Library is normalized and enriched for full-length clones and was constructed by 6 Gruber (Invitrogen). Research Genetics tracking code 021. Note: this is a NIH MCC Library."
                                                                                                                                                                                                                                                                                                                                                                                                                                                      240

/note-"Organ: pooled brain, lung, testis; Vector:
pcMV-SPORT6; Site_1: NotI: Site_2: EcoRV (destroyed); RNA
source annonymous pool of 6 male brains, age fange 23-27; 1
male lung, age 27; and 1 male testis, age 69. Library is
oligo-dT primed and directionally cloned (EcoRV site is
estroyed upon cloning). Average insert size 18 kb,
insert size range 1-3 kb. Library is normalized and
enriched for full-length clones and was constructed by C.
